TECNOLOGIA PARA GRANDE DESEMPENHO E MUITA ECONOMIA

Todos os filtros TECFIL são produzidos com alto padrão de tecnologia para garantir o melhor rendimento do veículo, economia e redução de impactos ao meio ambiente. Para obter sempre os melhores resultados, **siga as orientações do manual do veículo** em relação a troca dos filtros de ar, combustível e óleo.

SAIBA MAIS

FILTRO DE AR

Os motores de combustão precisam da entrada de ar limpo para obter um funcionamento perfeito, por isso, o filtro de ar é parte vital no processo de filtração de partículas indesejadas. Sua principal característica é reter as impurezas do ambiente externo deixando o motor em condições ideais. Trocar o filtro de ar no momento certo evita ainda o consumo excessivo de combustível, o superaquecimento do motor, a perda de potência e o aumento de emissão de gases poluentes pelo escapamento.

FILTRO DE COMBUSTÍVEL

O filtro de combustível liga o tanque de combustível ao motor e é classificado como item de segurança. Sua função é filtrar o combustível antes que ele chegue ao motor. Os filtros de combustível TECFIL garantem maior vida ao sistema de injeção e carburação, eliminando partículas indesejadas como pó, ferrugem e resíduos do tanque, garantindo o pleno funcionamento do motor e reduzindo custos com manutenção corretiva.

FILTRO DE ÓLEO

É um item de alta importância para o perfeito funcionamento do veículo. Sua principal função é impedir a passagem de partículas prejudiciais (provenientes da fricção das peças) para o motor, evitando assim desgastes excessivos e prematuros dos componentes internos durante seu funcionamento. Os filtros de óleo TECFIL são projetados para atender as exigências dos mais diferentes tipos de motor, proporcionando assim o melhor rendimento com a maior segurança.
